Stephen Amartey

Sunyani, Ghana | BS-0078-5601 | Stephen.amartey@ghs.gov.gh | LinkedIn: www.linkedin.com/in/stephen-amartey-837b9a52

Professional Summary

Data-driven Public Health Officer (Health Information), Biostatistician, and Municipal Research Coordinator with over 5 years of experience in statistical modeling, health survey design, health information systems (HMIS/DHIS2), and data quality assurance within public health systems. Expertise in designing and implementing sampling strategies, managing large health datasets, and conducting rigorous data analysis using R, Stata, Python, and geospatial tools. Adept at providing technical guidance and training to in-country teams, ensuring high-quality data for decision-making. Experience collaborating with government agencies, international development partners, and health information teams to enhance healthcare research and monitoring initiatives.

Key Skills

- Statistical Analysis & Survey Methodology
- Sampling Strategies & Data Quality Assurance
- Data Management & Integration
- Geospatial & Quantitative Research
- Capacity Building & Training
- Health Information Systems (HMIS, DHIS2) & Analytics
- Research Coordination & Evidence Translation
- Proficient in Stata, R, Python, DHIS2, Power BI, and GIS Tools

Professional Experience

Municipal Research Coordinator | Ghana Health Service

Jomoro Municipal Health Directorate, Western Region, Ghana | 2026 – Present

- Coordinate the municipal research agenda, identifying priority operational research questions aligned with Ghana Health Service and national health sector priorities.
- Support development of research protocols and facilitate submissions for ethical review and administrative approvals, ensuring compliance with research ethics and data protection requirements.

- Serve as the Directorate's focal point for researchers, universities, regional and national research units, and development partners conducting studies in the municipality.
- Maintain a municipal research register to track proposed, ongoing, and completed studies, timelines, and deliverables.
- Oversee field implementation of research activities, including training and supervising data collectors, monitoring data quality, and resolving implementation challenges.
- Lead data management, statistical analysis, and interpretation of research findings using Stata, R, and DHIS2.
- Prepare and disseminate research outputs, including policy briefs, abstracts, and reports, and present findings at municipal and district performance review meetings.
- Promote use of evidence in decision-making by translating research findings into actionable recommendations for programme managers and health facility teams.
- Mentor and build the capacity of health staff in research methods, data analysis, and scientific writing.

Public Health Officer (Health Information) | Ghana Health Service

Jomoro Municipal Health Directorate, Western Region, Ghana | 2021 – Present

Appointed as Biostatistics Officer; converted to Public Health Officer (Health Information)

- Designed and implemented sampling methodologies for health data collection across multiple districts, ensuring statistical rigor and representativeness.
- Managed, cleaned, and analyzed large datasets, integrating data from multiple sources such as master facility lists and national health databases.
- Conducted statistical weighting and adjustments (raking, propensity weighting) to mitigate biases in survey data.
- Led training workshops on data quality assurance, survey methodologies, and statistical analysis for district health teams and stakeholders.
- Provided technical guidance on designing and executing data validation protocols, enhancing reliability across survey cycles.
- Developed automated workflows for data integration, cleaning, and validation to streamline reporting processes.

District Quality Improvement Manager | USAID Quality 4 Health (Q4H)

Jomoro Municipal Health Directorate, Western Region, Ghana | 2023 – Present

- Spearheaded district-wide data-driven interventions that improved key health performance indicators by 15%.
- Facilitated collaboration among healthcare providers, policymakers, and international partners to enhance healthcare data reporting and utilization.
- Conducted advanced statistical analyses to inform continuous quality improvement strategies.

Data Collector | Ghana Harmonized Health Facility Assessment (HHFA)

2022

- Trained and participated in the nationwide data collection for the Ghana HHFA, ensuring adherence to standardized data collection methodologies.
- Collected and validated data from health facilities and communities, contributing to comprehensive health systems assessments.

District Coordinator – Network of Practice (NoP) Initiative

Jomoro Municipal Health Directorate, Western Region, Ghana | 2023 – Present

- Led district-wide policy implementation for best practices in health data reporting and quality assurance.
- Organized and facilitated training sessions on data collection, processing, and utilization for district health professionals.

Education

BSc. Public Health & Allied Sciences (Health Informatics)

Catholic University of Ghana, Fiapre, Sunyani | 2009 – 2013 | Dean's List Honoree

Certifications & Professional Development

- Certified in Quality Improvement & FASTR Methodology
- Advanced Training in Statistical Analysis & Health Informatics

- Proficient in DHIS2, AccessMod, and Survey Data Management

Technical Proficiency

- Programming & Statistical Software: R, Stata, Python, SPSS, Excel, Power BI, DHIS2, SQL
- Geospatial Analysis: GIS Tools, Mapping Techniques, Spatial Sampling
- Survey Design & Data Collection: Stratification, Propensity Weighting, Raking, Non-Response Adjustments

Publications & Knowledge Contributions

- Contributor to data-driven health policy briefs and research reports for the Ghana Health Service.
- Contributor, Frequent Assessments and Systems Tools for Resilience (FASTR) User Testing of the HMIS Analytical Platform in Ghana.
- Co-authored statistical analyses on healthcare quality improvement initiatives.

Languages

- English (Fluent)
- French (Basic, currently improving proficiency)
